# ***Ticket Man***

Andamiro

- ★ Basic or Self Redeeming options
- ★ Coin redemption within the machine or use Redeem Machine
- ★ Late December Availability

Look! Up in the sky! It's a bird! It's a plane! No, it's Ticket Man. The latest game in Andamiro's Coin Catcher™ series, Ticket Man, employs the manufacturer's magnetic retrieval mechanism that picks up novelty metal coins.

The central object in Andamiro's new game is the "Krypto Coin." Krypto Coins are redemption currency with a ticket value on the obverse side and a barcode (storing that information) on the reverse side. Players use Ticket Man's magnetic powers to pick up the coins.

Andamiro's Coin Catcher system features a revolving drum that holds up to 2,000 coins. Players move a joystick to guide Ticket Man over the vat full of coins and press a button to drop the magnet to pick up the coins. The magnet returns to the home position where the "catch" is positioned above the prize hole and released. Up to five coins can be retrieved at once.

Skee-Ball "Glow" as it incorporates an elaborate lighting package and all the glitz and glam, you'd expect from a boardwalk game in the early 1900s when Skee-Ball was born. # Jetball

UNIS Games

## ★ Available in January

Jet Ball Alley is an alley bowler, meaning that players will know exactly how to play when they approach it. Insert credits; then, you are given balls to roll down the ramp towards a matrix of hole targets. These targets are enhanced with multi-color LED lighting, and then players are directed to try and hit three holes in a row to score (the hits can be horizontal, vertical, or diagonal lines). Unlike other alley games, which only let you play with nine balls, here you keep going until the clock runs out. Scoring "combo's" yield more points. Players also have a chance to play the BONUS round if they can reach/surpass a specific high score.

A classic game elevated with the latest in modern display technology

- Mixed Reality (MXR) gaming in a fun and familiar package
- Time-based game instead of limited to a several balls; score as much as you can before the clock is up!
- 55" HD clear projection overlay display for a unique "holographic" type look
- Nine target holes, each enhanced with RGB LED lighting
- Additional LED lighting further accentuates the game cabinet
- Available as a single or in a 3-unit linked package

# To Tha Net / To Tha Net Jr.

UNIS Games

## ★ Available in January

At its core, To Tha Net is a basketball arcade game. Every basketball machine essentially does that. So what's different here? The LCD backboard. Dazzling graphics & animations are displayed as people play, clearly showing progress and scoring. Also available in a "Junior" kid's model!

- A unique "mixed reality" twist on the classic basketball concept
- Basketball fun enhanced with a 65" HD display as the backboard.
