

Our monsters  
are hungry for  
your tickets.

Monster Munch gamifies the ticket counting process by allowing players to feed their tickets to one of our friendly Monsters. Each side of the cabinet feature a unique backlit character with graphics from head to toe, presenting a fun design to the players that covers the inner workings of the cabinet. A large bucket in the center of the cabinet keeps all tickets contained for easy maintenance, and a small internal blower over the ticket feeder clears ticket dust to keep the hardware running smooth.

Cashing in their winning tickets is usually the last experience a guest has in your venue, make it memorable! With reliable internal components and head to toe cabinet design that attracts customers, our Monsters are always hungry for more tickets!
