

Wile E. Coyote's ROCKET WHEEL

WILE E. COYOTE'S ROCKET WHEEL

Help Wile E. Coyote catch the Road Runner in the Looney Toon's Rocket Wheel redemption game! Rocket Wheel is a true game of skill where players test their strength by pushing down rapidly on a plunger mechanism which in turn rotates a large wheel. There are NO motors and NO brakes to control where the wheel stops – only the player's strength and gravity determine where the wheel will come to a stop! The object is to time the rotation correctly to win as many tickets as possible. A unique bonus feature allows for a multitude of additional tickets if the player successfully catches five "Roadrunners". All wins are enhanced on a centrally placed monitor which show graphics from the popular cartoon series!

SPECIFICATIONS

Assembled Dimensions: Length: 61.2 in. (155.5 cm), Width: 38.5 in. (98 cm), Height: 114 in. (289.5 cm)

Domestic Power Requirements: 110V / 60HZ

Unique Bonus Feature
